COMPUTERIZED AIRCRAFT MAINTENANCE PROGRAM FOR 1124 WESTWIND

REPORT COVERS PERIODS-
 PREVIOUS: 01/09/00 THRU 01/10/01
 ACFT OPER HRS: 15,718
 PRESENT: 01/11/01 THRU 01/12/02
 ACFT OPER HRS: 27,374

PAGE 1

PERFORMANCE AND RELIABILITY SUMMARY AND TREND REPORT

THIS REPORT IS COMPILED FROM THE DATA CONTAINED IN THE AIRCRAFT HISTORY REPORTS OF ALL THE SPECIFIC MODEL AIRCRAFT PARTICIPATING IN THE CAMP PROGRAM. THE DEFINITIONS OF THE COLUMNS ARE:

RANK: THE COMPONENT WITH THE HIGHEST PRESENT 12 MONTH REMOVAL RATE PER 1000 FLIGHT HOURS IS RANKED NUMBER 1. FOR COMPONENTS WITH THE SAME PRESENT REMOVAL RATE, THE PREVIOUS 12 MONTH RATE IS USED TO DETERMINE THE RANK POSITION.

DESCRIPTION: COMPONENT NAME.

NO. PER A/C: THE NUMBER OF THE SAME COMPONENT USED PER AIRCRAFT.

CAMP CODE NUMBERS: THE CAMP CODES USED TO DESIGNATE THAT COMPONENT AND POSITION.

NUMBER REPORTED: THE NUMBER OF REMOVALS REPORTED FOR (B) FAILURE AND (C) WORN DURING THE PREVIOUS AND PRESENT 12 MONTH REPORT PERIODS.

MEAN TIME BETWEEN UNSCHED REMOVALS: MTBUR IS CALCULATED BY MULTIPLYING THE TOTAL ACFT OPER HOURS FOR THE PRESENT 12 MONTH REPORT PERIOD BY THE NO. PER A/C DIVIDED BY THE NUMBER OF UNSCHEDULED REMOVALS (FAILURE AND WORN) REPORTED. AN ASTERISK INDICATES THERE WERE NO UNSCHEDULED REMOVALS REPORTED FOR THE PRESENT REPORT PERIOD.

MANUFACTURER RECOMMENDED REPLACEMENT: THE LOWEST REQUIREMENT RECOMMENDED BY THE MANUFACTURER TO REPLACE OR OVERHAUL THE COMPONENT.

REMOVAL RATE PER 1000 FLIGHT HOURS: THIS COLUMN LISTS THE PREVIOUS AND PRESENT REMOVAL RATE PER 1000 FLIGHT HOURS.

TREND: IF THE PRESENT REMOVAL RATE PER 1000 FLIGHT HOURS IS HIGHER THAN THE PREVIOUS RATE BY MORE THAN 20 PERCENT, THE TREND IS (-). IF LOWER BY MORE THAN 20 PERCENT THE TREND IS (+). IF NEITHER OF THE ABOVE THE TREND IS STABLE.

NOTE 1: ONLY COMPONENTS WITH UNSCHEDULED REMOVALS IN THE PREVIOUS OR PRESENT REPORT PERIODS WILL BE LISTED IN THIS REPORT.

NOTE 2: THE "MEAN TIME BETWEEN UNSCHEDULED REMOVALS" AND "REMOVAL RATE PER 1000 FLIGHT HOURS" ARE BASED ON THE NUMBER OF UNSCHEDULED REMOVALS REPORTED BY THE OPERATORS DURING THE GIVEN REPORT PERIOD. IT IS IMPORTANT THAT OUR OPERATORS REPORT EACH COMPONENT REMOVAL AND REASON REMOVED TO PRESENT THIS DATA ACCURATELY. IF INFORMATION ON A SPECIFIC PART NUMBER IS NEEDED, IT WILL BE PROVIDED ON REQUEST.

										REMOVAL RATE PER			
										1000 FLIGHT HOURS

INSUFFICIENT INFORMATION REPORT

Each item on the Insufficient Information report has missing information needed to properly update the item(s). Missing information will be one or more of the following:

*TSN and/or TSO

*Airframe Hours, Landings, Engine Cycles, Date

*Apu Hours or Starts

*Date of Manufacture

*Date of Expiration

For each item (code number) in the left hand column, please supply the missing information indicated by the question mark under the appropriate column heading, sign the authorization area and return for processing.

CAMP*Aviation from the ground up™*

Dear CAMP Subscriber,

Shortly you will notice that your CAMP reports will have a slightly different format than you see currently. This is because your aircraft is now being moved to our new AviSource maintenance system. AviSource generates the same reports and information as the CAMP mainframe system, with a number of additional benefits. You will find that the printed reports will now have more detailed descriptions and an improved look and feel.

You can continue to use the new reports and task cards in the same way that you have used CAMP reports in the past. However, if you would like online access and greater control of your maintenance records, you will want to take advantage of the full capabilities of AviSource. With AviSource you can access and print reports that are current to that moment in time. You can update maintenance tasks, build work packages and much more.

In order to introduce you to AviSource, we have set up a number of training options. Simply select the one that works best for you. Your choices are as follows:

- **Phone-Based Training**

A CAMP analyst is available for a one-on-one walk through of the AviSource system via the phone. We will assist you in setting up AviSource to work the way you want it to. Your CAMP support representative will spend as much time as required to help you learn the new AviSource system. There is no charge for phone-based training.

- **On-Site Training**

If you would prefer to have a CAMP representative come to your office and train your staff on how to use AviSource, you can schedule an on-site training session. On-site training can be done on a one-on-one basis or for a large group. The choice is yours. The cost for on-site training is \$750 per day plus travel expenses.

- **Training At CAMP**

If you would like to be trained at CAMP headquarters, you may send your staff to our training center at our Ronkonkoma, NY facility. Training at CAMP includes hands on computer training on AviSource for up to 16 people at a time as well as lunch and refreshments during breaks. There is no charge for training at CAMP.

As part of your AviSource training, you will receive passwords and user names to access your account on the system. Ongoing customer support is available via phone at no charge. To schedule an AviSource training session using any of the options above, please contact Judy Butler at CAMP Systems. Judy may be reached by calling 877-411-CAMP extension 209. Judy may also be reached at jbutler@campsys.com.

If you have any questions about using the reports when we send them to you, please call your aircraft analyst. We hope you will enjoy the new expanded features that AviSource brings to your CAMP maintenance tracking system.

Sincerely,

Ken Gray
President
